Learn About
PCB Design and Engineering
and eat pizza

Friday, October 5, 3:00 pm–5:00 pm | Riverside Hall room 1015
Join noted PCB design guru and Hornet Aluminary, Lee Ritchey as he discusses PCB design from the dark ages of one-sided PCBs to today’s 50+ layer PCBs. Get there early and receive a copy of Lee’s book, “Right the First Time, Volume 2.” This event is hosted by Perry Heedley, Professor Electrical and Electronic Engineering.

Earlier in the day part-time EEE instructor and industry veteran, Kris Moyer, will hold a PCB Open House. Check out the cool exhibits and explore PCB design and engineering as a career.

Friday, October 5, 12:00 pm–3:00 pm | Riverside Hall room 3009
Launch an IPC Student Chapter. Earn scholarships and connect with local working engineers that are members of IPC. Get the opportunity to network with your future employers while connecting your learning to real-world applications.

IPC represents companies like Northrup Grumman, Intel, Verifone, and 4000 more worldwide that employ engineers of all kinds. The standards IPC develops are used every day in the manufacture of electronics.

For more information about IPC Education Foundation, contact Colette Buscemi, Senior Director of Education Programs at ColetteBuscemi@ipc.org
